# **SITUATION SUMMARY**

## **2017 Statewide Winter Storms**

### **Cal OES Coastal Region**

#### **Paul's Slide, State Route 1, Monterey County**

Per Cal OES Coastal Duty Officer (CDO), as of 1300 hours on 05/25/17, Paul's Slide on State Route 1 has been closed to all traffic.

- Caltrans engineers report slide activity and the area has been closed in the interest of public safety.
- Assessment will commence and further details will be provided once released.

#### **Mud Creek Slide, State Route 1, Monterey County**

The Mud Creek area on State Route 1 sustained a major slide on the evening of 05/20/17, when over a million tons of rock and dirt fell down the slope continuing down to the ocean floor 250 feet off the shoreline.

- The Mud Creek area is ¼ mile in length, made up of five slides, four of which fell during this single incident and consolidated into one slide. The remaining slide now extends 1,500 feet in length over State Route 1 and is about 35 to 40 feet deep.
- Roadwork at Mud Creek was suspended and heavy equipment removed due to the threat of new slides and for safety of highway workers. Caltrans geologists and engineers plan to assess it further when this area stabilizes.
- Estimated opening date is 06/01/18.

#### **Pfeiffer Bridge Incident, Monterey County**

California Highway Patrol (CHP) and Caltrans had a hard closure on the Pfeiffer Bridge on HWY 1 at mile marker 45.52 (SB Sycamore Canyon and the Bridge) due to a crack in the bridge. The bridge has been demolished so the road is closed and estimates for some access from the north is late September 2017.

- Backup air medical transport plans have been developed for medical emergencies through Cal OES Law Enforcement Branch.
- All businesses north of the Pfeiffer Canyon Bridge closure are open to the public.
- Caltrans will continue the process of delivering construction materials and equipment to the site of the demolished bridge on HWY 1 via Nacimiento-Fergusson Road from Hwy 101 on Tuesday, 06/20/17.
- Some equipment will begin moving out one piece at a time throughout the week. These convoys of equipment will be escorted by CHP.
- Effective 07/01/17, there will be a shuttle available until the Pfeiffer Canyon Bridge reopens (estimated reopening date from Caltrans is September 2017) seven days a week, 1200-2000. North shuttle leaves every hour starting at noon. South shuttle leaves every 15 minutes from Loma Vista to Nepenthe. The last shuttle from north to south is at 1700 hours. The last shuttle from south to north is 1900 hours.
- Pfeiffer Big Sur State Park will reopen to the public on 07/01/17 after an 11-month closure due to the Soberanes Fire and winter storms.
- Julia Pfeiffer Burns State Park, Andrew Molera State Park, and Highway 1 at Pfeiffer Canyon Bridge remain closed.

# WEATHER OF CONCERN

## Weather of Concern

- High pressure over the Four Corners region will continue to bring above normal temperatures to portions of Central California mountainous areas.
- **Active Weather Warnings, Watches and Advisories by County:**
- [http://www.wrh.noaa.gov/sto/brief/wwa\\_bc\\_cal.php](http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php) - Temporarily unavailable.

# WEATHER SYNOPSIS BY REGION

## **NORTHERN CALIFORNIA**

A low pressure trough will linger over the Northern California region through Wednesday which will keep the 4-Corners area high from having as much influence. The warmest inland areas will be reasonably close to seasonal normals and within a few degrees of 100. There will continue to be some locally breezy conditions in the eastern Bay Area today with some low afternoon RH there as well, but RH should be a little higher today than Monday overall.

Weather conditions will remain much the same over the region through Wednesday with minimal chances of afternoon thunderstorms, with any that might occur likely to be only around Tahoe southward. The 4-Corners high will push westward again later this week for a return of dry, very hot weather to the region over the weekend. The chance of isolated afternoon and evening thunderstorms will increase a bit over the eastern areas later this week and over the weekend, but should occur mainly only about as far north as Mt. Lassen. Confidence in thunderstorm development is low, however. Afternoon temperatures will climb to 5-10 degrees above normal inland with the warmest areas around 107 and maybe as hot as 110 over the weekend.

The coastal marine layer will thin out even more later this week under the high pressure, but already overnight and morning marine layer cloudiness is fairly minimal and likely to remain so, though that cloudiness will be most persistent north of Cape Mendocino as is seasonably common.

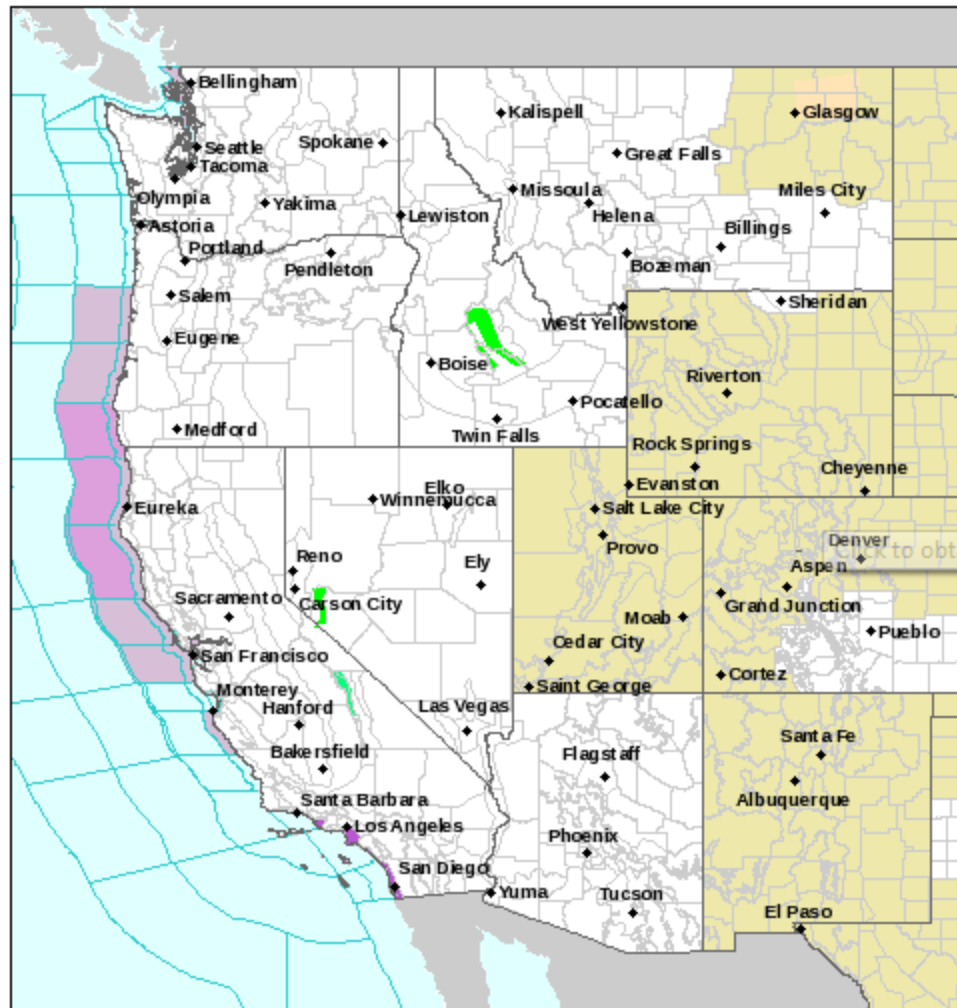

## **SOUTHERN CALIFORNIA**

\*\*\*Fewer thunderstorms the next few days\*\*\*

\*\*\*Cooler and more stable weather through Friday\*\*\*

Southwesterly flow aloft will begin to sweep most of the monsoonal moisture from the area today which should lead to far less afternoon convection over the next few days. Yesterday, there were over 800 lightning discharges across the Geographic Area mainly over the deserts and Sierras. Today, one or two storms will be possible in northern Ventura County and on desert adjacent sides of the Angeles and San Bernardino N.F.'s, but the vast majority of the storms will remain over the Sierras and deserts. Wednesday through Friday, the only storms expected will be confined to the Sierra Crest. Temperatures (outside the deserts) will drop a few degrees through the end of the workweek with highs returning to near normal by Thursday. Afternoon RH will drop back into the 15-20% range away from the coast across most areas below 5,000 feet during the next few days. Some high clouds from former hurricane Eugene will drift by during the next few days which may filter out some afternoon sun. Afternoon southwest winds of 15-25 mph will be possible across the Antelope Valley and nearby areas each afternoon. Long range models indicate high pressure will return to the Four Corners, leading to warmer weather and scattered wet thunderstorms by Saturday or Sunday. Temperatures will likely reach the mid 90s with much higher RH by the first part of next week.

### **EMAC and Public Assistance - 2017 Winter Storms**

- Cal OES Recovery Division identified the need for Public Assistance subject matter experts to assist with the aftermath of the 2017 Severe Winter Storms. Accordingly, Cal OES requested assistance from other states through the Emergency Management Assistance Compact (EMAC) - the Nation's mutual-aid system. New Jersey and Colorado provided personnel that arrived on Monday, 06/13/17. Both states along with other potential states will be providing support between now and the beginning of September at various Joint Field Offices throughout California. The goal is to assist those impacted counties in identifying disaster related damage and program eligibility.
